

# Memorial Hermann Rehabilitation Hospital-Katy

Memorial Hermann Rehabilitation Hospital-Katy is a leading facility in rehabilitation medicine. Our patient-centered approach embodies a strong commitment to overall quality of life and works to inspire hope in people whose lives have been altered by illness or injury. Memorial Hermann Rehabilitation Hospital-Katy has been accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF), which signals our commitment to continually improving services, encouraging feedback, and serving the community.

## Inpatients Served In 2023

## Therapy Services

Individualized and group therapy  
Shown in hours and minutes, per patient, per week  
All patients

## Patient Satisfaction

Overall satisfaction with the program  
(Scale 0.00 – 100.00)

Along with individual and group therapy sessions, the hospital's weekend program also offers classes focused on family education, additional therapy needs; as well as, group and leisure activities, providing the necessary time and resources for our patients to achieve their discharge goals.

Data obtained from eRehabData for the reporting period of CY2023 and includes all discharge patients.

The Net Promoter Score provides a snapshot of our patients overall experience and how likely they are to recommend our facility.

Data obtained from Qualtrics for the reporting period of CY2023.

(over)

Memorial Hermann Rehabilitation Hospital-Katy offers 35 private rooms for individuals receiving inpatient rehabilitative care. Our Inpatient Rehabilitation Program uses a multidisciplinary approach that combines the benefits of physical, occupational and speech therapy with neuropsychology, social services and round-the-clock nursing care. Personal performance goals are incorporated into a customized rehabilitation treatment program. Team members at Memorial Hermann Rehabilitation Hospital-Katy are among the best trained and most experienced rehabilitation professionals.

## Rehabilitation Outcomes

The self care and mobility outcome measures are used to assess the progress of a patient’s functional skills such as dressing, bathing, and eating. They are also used to measure the effectiveness of rehabilitation care delivered by the rehab team; as well as, the effectiveness of the rehab program. This score is measured upon admission and again right before discharge. The difference between the two scores represents the patient’s functional gains achieved in response to an inpatient rehabilitation therapy program.

## Functional Improvements from Admission to Discharge

## Discharge Locations

Percentage of patients discharged to home or community

Percentage of patients discharged to an acute-care facility

Sometimes patients with medical complications have to return to an acute-care hospital for further medical care. When these transfers are not planned, they are defined as an unplanned acute-care admission.

Data obtained from eRehabData for the reporting period of CY2023.
