

Bryan Oh, M.D.

Neurosurgeon

Assistant Professor, Department of Neurosurgery

The University of Texas Health Science at Houston (UTHealth) Medical School

Bryan Oh, M.D., is a specialist in neurological surgery with specific expertise in the surgical treatment of disorders of the spinal column and cord. He also specializes in complex reconstructive surgical techniques as well as minimally invasive approaches.

Dr. Oh earned his medical degree with distinction from Stanford University School of Medicine in California. He subsequently completed his general surgery internship and neurological surgical residency at the University of Southern California's Keck School of Medicine. Dr. Oh's fellowship in Spine was completed at the University of Southern California, Rancho Los Amigos.

Prior to joining Mischer Neurosurgical Associates, Dr. Oh was a member of the clinical faculty at the University of Southern California's Keck School of Medicine in addition to serving as staff neurosurgeon at Kaiser Permanente Medical Center in Woodland Hills, Calif. The recipient of numerous honors and awards, Dr. Oh was a National Merit Scholar Finalist and selected for the Howard Hughes Medical Institute Medical Student Fellowship. Additionally, he earned the award for Excellence in Student Research from Western Medical Student Research Forum, Carmel, Calif. At Stanford University, he was a member of Phi Beta Kappa and received a Golden Grant for Humanities Research.

Dr. Oh is committed to building a premier neurosurgical practice located at the Memorial Hermann Northeast Hospital Campus that is easily accessible to the entire northeast Houston community. He is dedicated to providing exceptional clinical care that leads to the best possible outcomes for his patients.
